Journal of Fluid Mechanics Volume 409 25 April 2000

H. G. Hornung	Oblique shock reflection from an axis of symmetry	1
A. Elcrat, B. Fornberg, M. Horn & K. Miller	Some steady vortex flows past a circular cylinder	13
D. I. Meiron, D. W. Moore & D. I. Pullin	On steady compressible flows with compact vorticity; the compressible Stuart vortex	29
H. K. Moffatt	The interaction of skewed vortex pairs: a model for blow-up of the Navier–Stokes equations	51
P. E. Dimotakis	The mixing transition in turbulent flows	69
J. Jiménez	Intermittency and cascades	99
D. Knight, M. Gnedin, R. Becht & A. Zheltovodov	Numerical simulation of crossing-shock-wave/tubulent-boundary-layer interaction using a two-equation model of turbulence	121
K. R. Sreenivasan & C. M. White	The onset of drag reduction by dilute polymer additives, and the maximum drag reduction asymptote	149
H. A. Stone	Philip Saffman and viscous flow theory	165
M. R. Foster	The effect of rotation on vertical Bridgman growth at large Rayleigh number	185
D. G. Crowdy	Hele-Shaw flows and water waves	223
S. D. Howison	A note on the two-phase Hele-Shaw problem	243
H. D. Ceniceros & T. Y. Hou	The singular perturbation of surface tension in Hele-Shaw flows	251
S. Tanveer	Surprises in viscous fingering	273
